NSE Advance – Decline Ratio

Technical View – NIFTY (26,140.75)

NIFTY [N59901] 26140.75, -0.14%

Price Avg(E,20) Avg(E,50)

Observations

- This Wednesday, NIFTY50 opened the day at 26,143.10, later forming a high of 26,187.15. The index closed trading for the day at 26,140.75 losing 0.14%. CIPLA appeared as the top loser after USFDA flags compliance gaps on key partner. Auto stocks dragged the index down as they witnessed mass profit booking. Troubled worries regarding US tariffs and continuous FII selling contributed to the negative movement in the market.
- NIFTY50 presented a bearish Doji candlestick for the second consecutive session, representing the deep indecision between the bulls and the bears in the market while extending the lower high – lower low structure. The index continues to trade above all the major EMAs while slipping beneath the Upper Bollinger Band and moving close to the Midline Band. RSI was recorded at 53.96, performing a bullish crossover as it slipped below the reference line. The MACD line managed to trade above the Signal line with the MACD histogram contracting to 10.60. In conclusion, the indicators depict a fading momentum with NIFTY50 carrying on the consolidation phase.
- Looking at the levels, it appears that 26297 is performing as a significant resistance level for the Nifty. On the higher side, though, 26192/26206/26251 levels will act as a resistance area for the NIFTY. If we look at the lower side, support is located at 26072/26058/26013 and 25967 levels.

20 – Days EMA	50 – Days EMA	100 – Days EMA	200 – Days EMA
26081.57	25913.03	25611.63	25121.73

Technical View – BANK NIFTY (59,990.85)

BANKNIFTY [N59906] 59990.85, -0.21%
 Price Avg(E,20) Avg(E,50)

Observations

- On the 7th of January, BANKNIFTY began trading at 60,039.70, reaching a high and a low of 60,065.40 and 59,760.65 respectively. Slipping below the 60,000 mark, the close for the index was noted at 59,990.85, losing 0.21%. HDFC Bank, the top weighted constituent in BANKNIFTY tugged the index performance down as it fell 1.24%. The index saw an increase in trading volume from 295.39M to 376.31M as participating interest arose among the investors.
- BANKNIFTY portrayed a small bodied bearish candle with an upper shadow and a much longer lower shadow suggesting buying interest in the market. While the index trades above the 20,50,100 and 200-day EMA, it has slipped beneath the Upper Bollinger Band. The RSI has taken a fall to 62.85, yet it remains above the reference line. MACD line maintains its position above the Signal line with the MACD histogram falling to 66.79. Overall, while the broader trend remains positive, a cautious outlook should be maintained.
- Collectively, these factors reinforce a constructive outlook for the index in the near term. Looking at the levels, it appears that 60091 is performing as a significant resistance level for the Nifty. On the higher side, though, 60127/60244/60360 levels will act as a resistance area for the NIFTY. If we look at the lower side, support is located at 59787/59751/59634 and 59518 levels.
