Major Event of the Week

- **India CPI:** India's retail inflation rose to 1.33% YoY in December 2025 from 0.71% in November, driven by a slower decline in food prices, but remained well below the RBI's 2–6% comfort band.
- **Japan Current Account:** Japan's current account surplus widened to JPY 3,674.1 billion in November 2025, aided by a sharp improvement in the goods balance and a steady rise in primary income surplus.
- **India Passenger Vehicles:** India's passenger vehicle sales jumped 29% YoY to 349,170 units in December 2025 on festive demand and policy support, though sales declined 1.6% on a sequential basis.
- **US Inflation:** US headline inflation held steady at 2.7% YoY in December 2025, while core inflation remained at a four-year low of 2.6%, reinforcing expectations of a policy pause by the Fed.
- **China Trade:** China posted a record trade surplus of USD 1.189 trillion in 2025, driven by strong export growth to non-US markets and resilient import demand.
- **India WPI:** India's wholesale price inflation turned positive at 0.83% YoY in December 2025, the fastest pace since April, led by higher manufacturing prices despite continued deflation in fuel.
- **India Balance of Trade:** India's merchandise trade deficit widened sharply to a record \$25 billion in December 2025, as imports rose 8.8% YoY to \$63.6 billion due to higher energy costs amid pressure to curb Russian oil purchases. Exports grew modestly by 1.8% to \$38.5 billion.
- **India Unemployment data:** The unemployment rate in India inched higher to 4.8% in December of 2025 from the series low 4.7%. The overall Worker Population Ratio for persons of age 15 years and above rose marginally to its yearly peak of 53.4 per cent last month.
