Major Events of the Week

- **India WPI Data:** India's wholesale inflation accelerated to 9.68% YoY in May 2026, its highest level since September 2022, driven by a sharp rise in fuel prices amid the West Asia crisis, along with higher manufacturing costs and food inflation.
- **India Unemployment Rate:** India's unemployment rate rose to 5.5% in May 2026 from 5.2% in April, marking its highest level in nearly a year and surpassing market expectations. The increase was driven by higher rural unemployment, while urban unemployment declined to its lowest level in over a year.
- **China Industrial Production:** China's industrial production grew 4.5% YoY in May 2026, supported by stronger manufacturing and utility output, while mining activity moderated. Industrial output expanded 5.4% during the first five months of the year.
- **Japan Trade Deficit:** Japan's trade deficit narrowed significantly in May 2026 as exports surged 17%, marking the strongest growth since November 2022, while imports remained robust on the back of healthy domestic demand despite lower crude oil shipments.
- **UK Inflation:** The UK's inflation rate remained at 2.8% in May 2026, its lowest level since March 2025, as easing housing costs offset a sharp rise in transport inflation driven by higher fuel prices and airfares.
- **USA Fed Decision:** The Federal Reserve kept interest rates unchanged at 3.50%–3.75% for a fourth consecutive meeting, while lowering its 2026 growth forecast and highlighting persistent inflation risks amid uncertainty stemming from the West Asia conflict.
- **Japan Inflation:** Japan's inflation rate rose marginally to 1.5% in May 2026 from 1.4% in April, as the impact of government energy subsidies faded. Core inflation remained at 1.4%, below the central bank's 2% target for a fourth straight month, while consumer prices increased 0.4% month-on-month.
